

coke? pfft... snorting white shit up your nose? Pass... I can barely drink a pilsner beer these days without getting bored of it. Alcohol just doesn't do it anymore for me. I'm usually one and done. Liquor wtn never work. I've tried so many mixed drinks and didn't find one I liked. Liquor with any beverage makes me wanna throw up. Ughh... I can't wtn... "B65" is all I have to look forward to, sure, animating gets tiring but the ghosts and their energy don't.

I could stare at them and talk to them for hours on end. They're all I need.

Screw real life people. I don't need them, I've got ghost friends, and they're not just inside my head.
